

• LASER ENGRAVING, MARKING & CUTTING •

Laser Tech - Company Profile

Laser Tech (PTY) Ltd. is a laser engraving and cutting company set up in Gaborone, Botswana in 2002. Laser Tech specialises in the laser engraving (or deep-etching) of a wide variety of materials, from wood, glass, laserable plastic, leather, cork, all metals etc. The company also does laser cutting of certain materials as requested.

Laser engraving is the art of deep-etching, with a laser, into a specific material to engrave an image, logo, text or symbol on the surface. Laser engraving is a permanent form of marking or branding an object. Unlike with printing, the engraving cannot be peeled off, therefore it is much more durable and long lasting than printing.

Laser Tech is one of a few companies in Botswana that does this form of engraving and it strives to ensure the utmost in quality and customer satisfaction when it comes to the engraving of materials.

Over the years Laser Tech's client base has grown as has its range of products offered to old and new customers. Laser Tech does company signage, corporate gifts, name badges, a wide range of indoor and outdoor signage, photo engraving, personalised gifts, stamps, and of course souvenirs.

Local, Botswana-inspired souvenirs and personalised gifts make up the majority of Laser Tech's stock, mainly focusing on wooden engraved items, from key ring holders, to wooden coasters, wooden pens and boxes, wooden business card holders and so on. As well as offering customers a wide variety of locally-inspired designs on a wide range of wooden items, Laser Tech also gives its clients the freedom to personalise and customise gifts and souvenirs if the client so desires.

With modern software and technology, Laser Tech offers the industry an unsurpassable service with quality engraving every time and a broad range of materials, items, gifts and souvenirs to satisfy the engraving needs of any business, entrepreneur, tourist, event or special occasion that may arise.
